CAREER OBJECTIVE

Full-stack software developer with hands-on experience across MERN/MEAN stacks, API testing, and applied AI/ML, currently building AI-powered tools and full-stack features in a live ecommerce development environment. Seeking a Software Developer role at Odoo to design and ship scalable, well-tested modules, combining strong fundamentals in JavaScript/Python development with practical experience integrating AI capabilities into production-facing products.

EXPERIENCE

AI Engineer Intern & Business Development Executive

Apr 2026 – Present

Viha Digital Commerce | Ahmedabad, India

- Build AI-powered internal tools for an ecommerce development agency working across Magento/Adobe Commerce, Shopify, WooCommerce, and headless commerce stacks.
- Developed an internal AI-driven sales enablement tool that audits ecommerce storefronts and generates instant improvement reports for prospective clients.
- Prototyped an AI-based style/recommendation advisor using Claude Vision for product- and image-driven suggestions.
- Support business development by scoping technical proposals and translating client requirements into actionable project plans, including a WhatsApp automation platform proposal (Next.js, Node.js, PostgreSQL, Redis, Meta Cloud API).

Intern – Manual & Automation Testing

May 2024 – Feb 2025

Unicode Technologies Pvt. Ltd. | Ahmedabad, India

- Performed manual and automation testing across web and mobile platforms; authored test cases, bug reports, and test summary reports.
- Created and executed API test cases in Postman to validate RESTful services.
- Applied basic AI/ML testing and data validation techniques; used JIRA, Postman, and Selenium WebDriver in daily workflow.

Python Developer Trainee

May 2023 – Jun 2023

TOPS Technologies | Ahmedabad, India

- Developed web-based applications using Python with MySQL for data management and backend integration.
- Gained foundational exposure to data analysis workflows and basic AI model implementation using Python libraries.

TECHNICAL SKILLS

Programming: Python, JavaScript, React, Node.js, HTML, CSS

AI/ML: NumPy, Pandas, Scikit-learn, TensorFlow (basics), OpenAI API, LangChain (basics), Matplotlib

Databases: MySQL, MongoDB

Testing & QA: Postman, Selenium (basics), JIRA

Data Visualization / BI: Tableau, Power BI

ACADEMIC & PERSONAL PROJECTS

Electro Shop — Ecommerce Platform (MERN Stack)

Final Year Master's Project

- Built a full-featured electronics ecommerce site with cart, product listings, and checkout functionality.
- Designed a responsive React UI with efficient state management; implemented authentication and product management via Node.js, Express, and MongoDB.

Restaurant Management System (MEAN Stack)

- Developed a web application to manage restaurant orders, menus, and kitchen workflow with an admin panel for full CRUD operations.
- Integrated Firebase for real-time updates and authentication.

Meesho-Inspired Ecommerce Store with AI Chatbot

- Built a responsive ecommerce platform with product listings, category filtering, cart, and secure checkout.
- Integrated an AI chatbot for customer support and instant query handling.
